<u>Assignment 1B</u>

Remember the **QUIZ** you give Friday Morning?

The Question was:

- Merge **Orders** and **Returns** Table into a **new query** and show the **return** status into the merged table named **Orders by Returns** using **LEFT OUTER JOIN.**

Please implement this (VERY CAREFULLY) on the workbook that we have been working on in class. DO NOT MESS IT UP or it will have repercussions on your work that we are doing in the class.

PS: YOU ARE ENCOURAGED TO FIND WHY RIGHT OUTER IS NOT WORKING ON THIS DATASET BUT MAKE SURE THAT IT DOES NOT HAVE AN AFFECT ON YOUR ORIGINAL FILE.

YOU DO NOT HAVE TO SUBMIT THIS ASSIGNMENT, I WILL PERSONALLY VIEW YOUR FILES IN CLASS FIRST THING ON THE **MONDAY MORNING.**

<center>**HAVE A NICE WEEKEND.**</center>
